

What is a quadrilateral?

---

Parallelogram

- Opposite sides are \_\_\_\_\_
- Opposite angles are \_\_\_\_\_
- Consecutive angles are \_\_\_\_\_
- Diagonals \_\_\_\_\_

Rectangle

- Opposite sides are \_\_\_\_\_
- Every angle \_\_\_\_\_
- Consecutive angles are \_\_\_\_\_
- Diagonals \_\_\_\_\_

Rhombus

- Opposite sides are \_\_\_\_\_
- All sides are \_\_\_\_\_
- Opposite angles are \_\_\_\_\_
- Consecutive angles are \_\_\_\_\_
- Diagonals \_\_\_\_\_

Square

- Opposite sides are \_\_\_\_\_
- All sides are \_\_\_\_\_
- All angles are \_\_\_\_\_
- Consecutive angles are \_\_\_\_\_
- Diagonals \_\_\_\_\_

Trapezoid:

- One pair of \_\_\_\_\_ sides.

Isosceles Trapezoid:

- One pair of \_\_\_\_\_ sides.
- Sides that aren't \_\_\_\_\_ are \_\_\_\_\_.
- Angles coming from parallel sides are \_\_\_\_\_.
- Consecutive angles are \_\_\_\_\_.
- Diagonals are \_\_\_\_\_.

Kite:

- Two pairs of \_\_\_\_\_, \_\_\_\_\_ sides.
- Where the pairs meet, angles are \_\_\_\_\_.
- Diagonals are \_\_\_\_\_.
- One diagonal \_\_\_\_\_ the other.
- The other diagonal \_\_\_\_\_ opposite angles.

**Graphic Organizer:**

Quadrilaterals shown by sides and diagonals
